

**LOGISTICS SUPPORT ANALYSIS RECORD (LSAR)
DATA REQUIREMENTS**

GENERAL INFORMATION

Selection of a data element shall constitute the selection of all data keys or data dependencies required to document the element in the LSAR. Where more than one data element code applies to a data selection, the Code column contains dashes (-). For narrative data, where each data element definition is separately selectable to a common data table, the code column is blank.

This form consists of two sections. The first section consists of government furnished data. The second section consists of the LSAR Data Selection Sheets and is divided into three parts. Part 1 is LSAR data selected by an entry in the required column. Part 2 is LSAR provisioning data selected by an entry in the type of provisioning list. Part 3 is packaging data selected by an entry under a packing categorization.

Explanation of codes appearing under the KEY column are provided below:

KEY KEY EXPLANATION

- K Data table key. It is required when any data element of the table is selected.
- F Foreign key. It originates in another data table and is required prior to a data element of the table being documented. Foreign keys appear only once on the data selection sheet within a major area, e.g., Task Analysis and Personnel and Support Requirements.
- M Mandatory data. It is a nonidentifying data element that is required when entering information in the data table.
- G Data element provided by the requiring authority.
- B Data element that is both a key/foreign key and is provided by the requiring authority.
- A Army peculiar data element.
- N Navy peculiar data element.
- R Air Force peculiar data element
- C Marine Corps peculiar data element.
